IN THE PAST THE STORY OF THE FUTURE IS WRITTEN

60 YEARS OF DIALOGUE WITH THE FUTURE

Elnagh has celebrated its 60th birthday, an exultation of innovation in everything from technology to engineering, because the world moves forward, driven by Elnagh.

With one idea after another, Elnagh rounded the half-century buoy and now sails onward toward its hundredth year, carried along by the same enthusiasm that has made it so famous throughout these years. With a company as vital and spirited as Elnagh, every product is a success well loved by its customers and admired by critics. Suffice it to think of all the articles written in Elnagh's time-honored magazine, *Andiamo*.

Elnagh is more than a brand, Elnagh is a way of thinking that is always oriented toward tomorrow, ahead of its time but with a deep appreciation for its history.

Elnagh has decided to celebrate its anniversary by unveiling the new Magnum, a historical motorhome with a glorious past.

One thing is certain. With Elnagh you always move forward: tomorrow's discoveries are already in the workshop.

IN THE PAST THE STORY OF THE FUTURE IS WRITTEN

For 60 years, Elnagh has been creating, innovating and redesigning the concept of movement. From the flexible fork for motor driven bicycles to the motorhome, Elnagh expresses all its exquisitely Milanese ingenuity with the same creativity that characterizes fabrics from the Eden of fashion.

With one of the largest fleets circulating in Europe, Elnagh is the best known brand on the road and in campgrounds. Elaborate words are no longer needed to describe it because each of its products contains everything that has always distinguished the brand and its history: inventiveness, determination and engineering.

Thanks to its youthful inventors, skilled artisans, project technicians and designers, Elnagh is a company one step ahead of the game, offering elegant and functional solutions with an attention to detail that only solid experience can offer.

Marco Polo was familiar with precious fabrics, Michelangelo was a master artist, Christopher Columbus studied sea routes. Elnagh creates campers. An Elnagh camper is a jewel of precision and comfort.

BARON

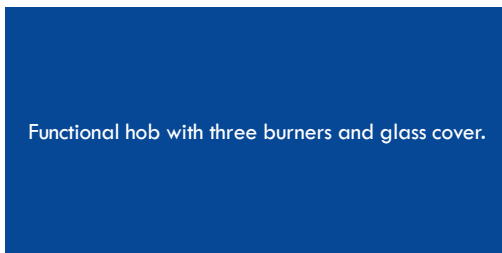

BARON RANGE PLUS

Baron. Elnagh welcomes you into the family.

If you have never climbed into an Elnagh camper, Baron is the one for you. Baron is the perfect camper for those who want to grab their bags and set off without any limitations. Baron is warm if you want to travel northwards and cool if you prefer to head south. It is comfortable in the winter and a pleasant refuge from the heat in the summer. Elnagh has already thought of everything, you just have to turn the key.

Control panel on entry door with master switch.

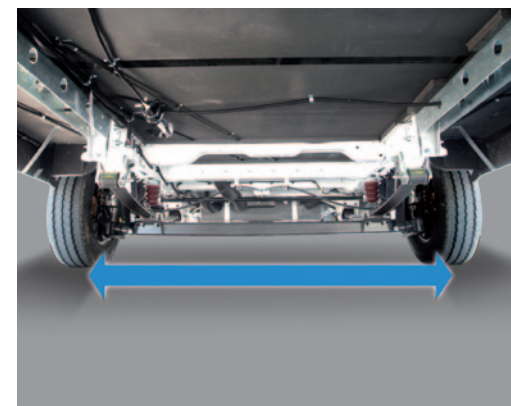

Functional hob with three burners and glass cover.

Wider track for secure road-holding and improved cornering stability.

Spacious garage and horizontal rear lights for greater visibility.

PRINCE

PRINCE RANGE PLUS

Prince. The answer before the question is asked.

Elnagh knows its most demanding guests well. That's why it created Prince. Prince has everything you want for a perfect vacation: soft-lined décor, captivating colors, designer accessories. With Prince, your travels will have that extra something ... more style, more comfort, more vacation.

Wider track for secure road-holding and improved cornering stability.

The characteristic design of the rear with tail lamps integrated into the bumper columns.

Sleek, aerodynamic mansard. Pillar windows for greater visibility – an original Elnagh design.

Integrated, aerodynamic door hinge.

Nautical style for the modern canopy with built-in Sky – Dome.

Sky – Dome for enhanced interior luminosity, outfitted with blinds.

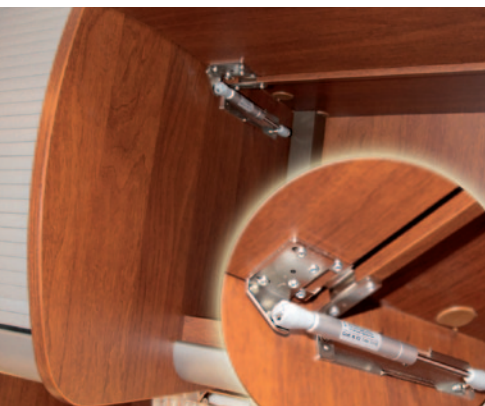

Functional folding extension to add a berth in the dinette.

Unparalleled comfort thanks to the telescoping table leg that can be shifted both horizontally and vertically.

Fiberglass kitchen counter with modern and functional design featuring capacious integrated sink.

Cupboard doors with lateral pistons for soft opening, in perfect automotive style.

Seitz door with integrated window and bug netting for enhanced interior livability.

PRINCE

Central control console with LCD screen.
Interior and exterior temperature sensors.

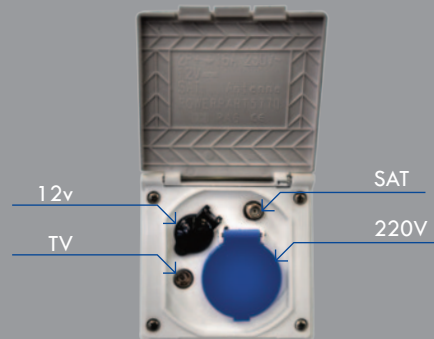

New trimmer graphics
with modern, dynamic
design.

Branded hubcaps with raised Elnagh logo in resin.

New TV bracket with reinforced guides to
reduce twisting and enhance stability.

Multifunction external socket for TV, 12V, 220V
and Satellite

Third brake light integrated into the design of
the thermoformed rear.

Seitz windows with aluminum frame integrated
into the design of the fiberglass sides.

Elegant resin lettering in relief.

MAGNUM

MAGNUM RANGE PLUS

Leave your work, the city and the bustle behind. Climb into your Magnum and you're off!
With Magnum, you'll be sure to reach your destination because the first one is ... your Magnum!
Magnum is the Elnagh top of the line: majestic, elegant and hospitable.
If you want to have what others merely admire from the outside, choose Magnum.
Traveling with Magnum is an exclusive delight.
Business Class? No, Magnum Class!

The characteristic design of the rear with tail lamps integrated into the bumper columns.

Design headlights to improve the visibility whatever the season.

The ergonomical and comfortable Aguti seats, made with sweating materials, make you drive safer due to their internal reinforced structure and their integrated seat-belts.

Central control console with LCD screen.
Interior and exterior temperature sensors.

Branded hubcaps with raised Elnagh logo in resin.

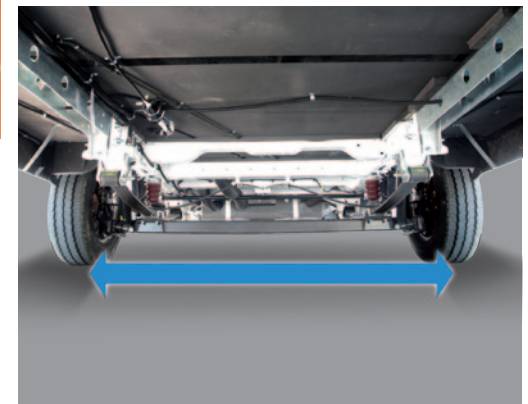

Fiberglass kitchen counter with
modern and functional design
featuring capacious integrated sink.

Cupboard doors with lateral pistons for soft
opening, in perfect automotive style.

New TV bracket with reinforced guides to
reduce twisting and enhance stability.

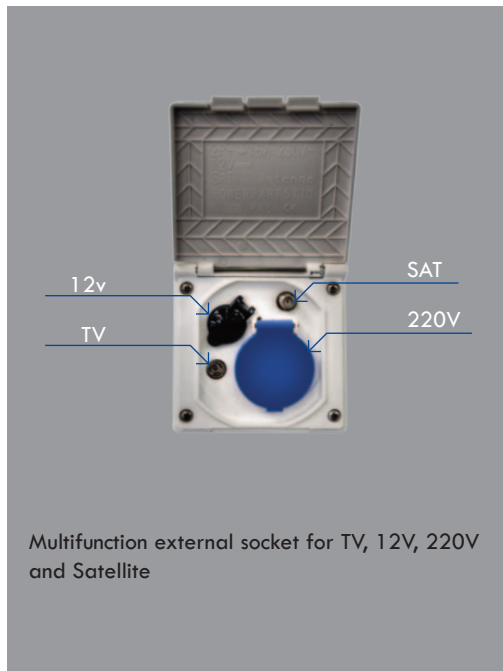

Wider track for secure road-holding and
improved cornering stability.

MAGNUM

Seitz door with integrated window and bug netting for enhanced interior livability.

STANDARD AND OPTIONAL EQUIPMENT ON ALL ELNAGH MODELS

STANDARD EQUIPMENT: STRUCTURE

FLOOR

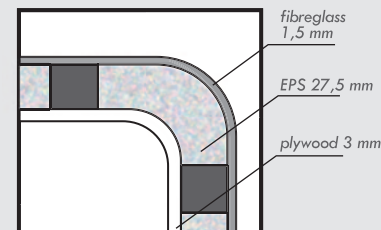

THICKNESS: 70 mm

Specially projected to achieve high thermic and acoustic isolation. High results in strength and torsional performances.

FIBREGLASS COATED WALLS AND ROOF

The materials combination used in the walls and roof production leads to the best results in terms of thermic and acoustic comfort as well as in terms of easy repair. The performance offered by the fibreglass is higher than the use of aluminium in which case the transmission level of heat, noise and cold is higher than when using the fibreglass.

Advanced technology for the body and shell. Technical specifications of our all-composite shells:

Resist mould and mildew

Water-repellent

Withstand high mechanical loads

Fire and acid resistant

May be used in temperatures between 50°C and +100°C

Crush-proof

Provide added insulation

STANDARD EQUIPMENT: BODY

WARM AIR VENTILATION IN OVERCAB (COACHBUILT MODELS)

HEATING WITH BLOWN AIR

ELECTRICAL PANEL WITH BATTERY CHARGER

12V AND 220V TV-SAT SOCKET (INSIDE)

All calculations of the masses mentioned in this catalogue are made according to the European Directive 95/48 CE and to the European Norm EN 1646 – 2 Standard.

TOTAL MASS IN RUNNING ORDER

It includes: base vehicle's weight (empty), driver, fuel, lubricants, cooling fluids, tools, gas bottles, fresh water tank. Some models have a clear waters load limitation (see label on loading point).

MAX PAYLOAD

Difference between the maximum technically admitted laden mass and the mass in running order.

It includes: passengers' weight excluded the driver, luggage and personal belongings.

All masses and weights are subject to a tolerance of $\pm 5\%$ complying with the European Directive 95/48/CE.

The installation of optionals or additional equipment reduces the maximum payload of the vehicle accordingly.

The total mass in running order indicated in this catalogue refers to the standard basic vehicle and it excludes the weight of any optional equipment.

In case of installation of additional overhanging appendixes such as towing hook or motorbike carrier the number of homologated places may vary depending on the specific circulation laws of each single country.

The drinking water installation fits the state of the art of the technique 03/2009 (Law 2002/72/EEC).

SEA S.P.A. – Elnagh reserves the right to modify, without any prior notice, the technical features and any other specification of its product range; all data included in present catalogue are to be considered indicative and not binding.

SEA, A SOLID INDUSTRIAL GROUP

SEA is one of the principal European camper manufacturers, and groups together some of the leading names in the sector, active for over 60 years. The wide recognition of the SEA brands and their continued appreciation over the years, coupled with its vast fleet of circulating vehicles, guarantee our clients an exceptional vehicle value retention over time.

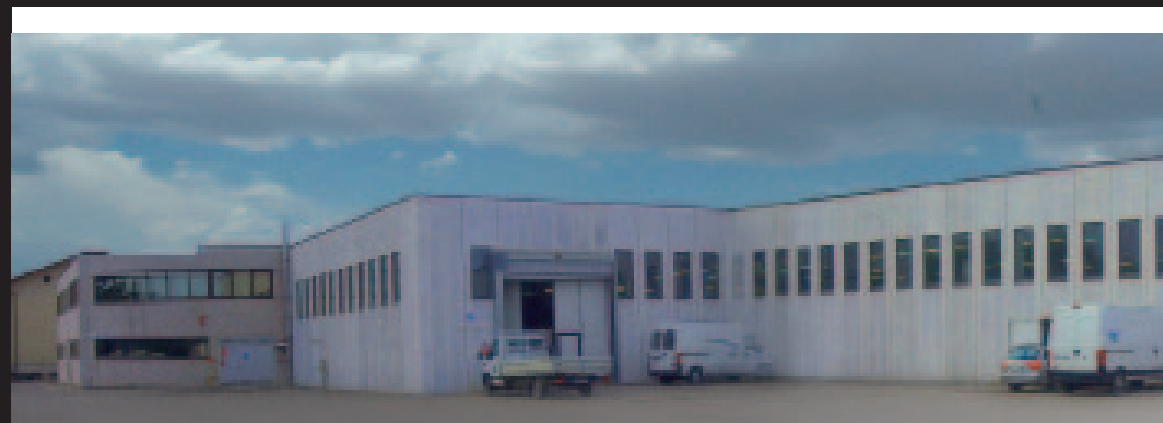

Thanks to its solid organisational structure, SEA is able to deliver products and services characterised by the utmost quality, professionalism and care: SEA fulfils the client's expectations with competence and dedication.

An ongoing process of searching for and selecting the finest suppliers, coupled with quality assured through tests and inspections at every stage of the production process, guarantee maximum reliability of the vehicles. The SEA group vehicles are produced in state-of-the-art facilities, through an industrialised production process in which the skills of individual operators and craftsmanlike attention detail confer an added value and quality differential.

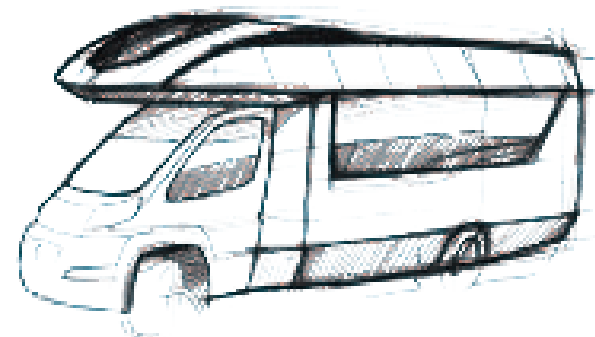

The day-to-day work of our research and development centres makes it possible to introduce novel technologies and innovative solutions designed to continually improve the products' performance.
